

Skin Care Products:

We look forward to introducing you to the science of skin care including essential products that will restore and maintain tone, minimize wrinkles, discoloration and treat acne. Our job is not done until you glow and feel your best!

Our time tested products, such as Obagi, are based on clinical studies and decades of effective results. Not all skin care products will improve and maintain your skin, and, they may contain harmful chemicals and preservatives. Obagi products are intended for all skin types and ethnicities.

We are constantly assessing the wide array of products available and will continue to provide excellent choices suited to your skin type, concerns and goals.

Nuderm System - This system will transform your skin and helps improve signs of visible aging such as dark spots, improve texture, tighten and reduces fine lines/wrinkles.

Vitamin C Serum - with or without a lightening agent can be used along with any Obagi System, enhancing skin cell turnover, providing antioxidant power and helping your skin to produce and maintain healthy collagen.

CRX Professional System - This system is clinically proven for the 20's and 30's with early sun damage, wrinkles, and discoloration. It will improve the texture of your skin to make it smoother, softer and glowing.

Clenziderm MD System - This system, supported by clinical studies, consists of three products that penetrate to reach bacteria in the pores, begins to reduce breakouts in as little as one week, and will prevent future breakouts.

The logo for VI Peel features the letters 'VI' in a large, green, serif font with a leaf-like graphic on the 'I'. To the right, the word 'Peel' is written in a smaller, grey, sans-serif font. A registered trademark symbol (®) is located at the top right of the word 'Peel'.The logo for Obagi consists of the letters 'O', 'B', 'A', 'G', and 'I' in a blue, serif font. Services and Treatments

Let our dedicated, experienced and knowledgeable staff of aestheticians and doctors become familiar with your medical history, skin condition, previous treatments and goals.

As certified professionals, they will provide choices, explain the basis for your care, delve into the various options available, and assist you in choosing the best start for your transformation journey.

We strive to ensure our clients feel valued, educated, and have a personal connection to the Dermaverto Staff member that provides their services and treatments.

We happily answer every single question presented before, during and after treatments and provide information on new treatments that may be suitable.

Our Services:

Neurotoxins and Fillers: These products are most commonly used on the forehead, crows feet and frown lines. The Botox, Dysport or Xeomin is injected just below the skin surface to inactivate the nerves, relax the muscle, and reduce or eliminate the wrinkle.

The extent of the treatment is based on the desires of the individual, the distribution, depth and location of the wrinkles he or she wishes to have treated.

Results are noticeable in 1-2 weeks, and a full treatment usually lasts 4-6 months. Some treatments, especially following the first, will require a follow up visit 2 weeks later to touch up remaining lines/wrinkles.

Facial Fillers: Fillers are a gel form of a product our skin naturally makes called Hyaluronic Acid (HA) that functions to retain water in our skin, and is therefore a "plumper." We make less HA over time, wrinkles develop, and there is greater relaxation to our skin. By injecting HA, the skin will absorb more water, lines are relieved, and as an added benefit, injection of these products stimulates collagen production. There are several products on the market, used for cheekbone area, folds around the mouth and lip enhancement. Your skilled injector, either an RN, NP, or MD, will thoroughly review your skin condition, discuss your treatment goals, describe the products, and make recommendations. Fillers usually last up to one year, and the newer products will last 1-2 years.

Laser Resurfacing: The most extensive treatment available for skin rejuvenation, removing a top layer of skin, reducing discoloration, fine lines, wrinkles, restoring strength, smooth texture, and stimulating collagen production. Anticipate a one week healing period, lots of redness, and some discomfort.

Laser Hair Removal: A time tested, safe procedure with results that last a lifetime. Say goodbye to razors, shaving cream and stubble. Show off your smooth flawless skin and wear that bikini with confidence!

Microdermabrasion: A technique that removes the top layers of skin and allows your top quality skin care products to be absorbed, make your skin glow.

Microdermabrasion every 6 months to 1 year, along with sun screen, can be a skin care program in itself. Especially helpful for prevention of acne breakouts.

Microneedling: Enjoy the benefits of this top notch, clinically proven procedure. The Skin Pen is the only FDA approved device, that will provide benefits up to one year following the procedure. The Skin Pen can be used on all skin types, procedures take 30 minutes and results can be seen in one treatment, for maximum benefit three treatments are recommended.

Facial Rejuvenation with PRP: Also known as the Vampire Facial. For this procedure, your blood is drawn into a tube that is spun in the centrifuge, the plasma is applied topically. The Skin Pen is used to create micro entry points for the platelet rich plasma to be absorbed. Growth factors are released, stimulating the skin to produce blood vessels and collagen. This procedure is safe, effective, and will enhance the general appearance of your skin. A vampire facial is suitable for all skin types, is a great addition to an existing effective skin care routine, or can be used to launch a rejuvenation program.

PRP / Hair Restoration: The physiology of hair growth is complex, influenced by genetics, diet, aging, hormones, the immune system, nutrition and many other factors. We know hair follicles are either healthy, in the process of becoming inactive, or in a state of permanent rest. Plasma, which contains growth factors, can be applied to the scalp with the assistance of the SkinPen to stimulate the hair follicles. This procedure, done in a series, will improve hair growth by 30-40%.

VI Peel: The VI Peel family treats acne, provides anti-aging benefit and restoration of skin tone, strength, and texture. You can expect softening of fine lines and wrinkles, even skin tone, smoother skin, and reduction in age spots/sun damage. The acne peel - Purify/Purify with Precision Plus - contains the original VI Peel formula plus the power of Benzoyl Peroxide, Kojic Acid and Hydrocortisone. This treatment will prevent breakouts and reduce acne scarring.

Obagi Blue Peel: The Blue Peel Radiance is superficial, salicylic acid based and can be used for a variety of skin types. This peel provides quick, glowing results including tighter, smoother and brighter looking skin. This Blue Radiance peel is a quick and easy procedure that be repeated in a series of 3 treatments for maximum benefit.
